

Dear UNFI:

As you know, the State of Vermont passed Act 120, and the accompanying rule, Consumer Protection Rule 121, which outline requirements for labeling of foods produced with genetic engineering. This law is scheduled to take effect on July 1, 2016.

To ensure compliance, we reached out to our suppliers and evaluated all of our products. Based on information and sworn statements provided by our ingredient suppliers, and Blue Diamond's assessment of its finished product formulas, we have determined that our products do not require labeling under Consumer Protection Act 120.

Thank you for your continued support of Blue Diamond Growers and our products. We truly appreciate your business.

Sincerely,

Blue Diamond Growers
