April 1, 2016

Dear Lori Davis:

This letter is a friendly reminder that effective July 1, 2016, the Vermont GE Food Labeling Act (the "Act") and the Vermont Consumer Protection Rule 121, Labeling Foods Produced with Genetic Engineering ("CP121"), go into effect. Packaged food items produced using Genetically Engineered (GE) ingredients and sold in Vermont retail establishments after that date must be labeled to indicate the products have been "Produced with Genetic Engineering" (or another appropriate variant of that statement under the Act and CP121). We are providing this information to allow you time to evaluate your products and make any changes to your labels that would be required under the Act and CP121. Products falling into several exemption categories do not require any labeling changes.

The attached spreadsheet summarizes the manner in which TH Foods has categorized its products. The spreadsheet and this letter have been prepared to familiarize you with the Act and CP121 so that you may determine how to properly label your products. (For example, we understand that products that are Certified Organic, or are verified as being Non-GMO by an authorized organization (such as the Non-GMO Project) do not need to be labelled as having GE ingredients under the Act and CP121.)*

We trust that you will take appropriate actions to comply with the Act and CP121.

Sincerely,

Richard Braem

Richard Braem
Regulatory Manager

*This letter does not constitute legal advice or a legal opinion. In determining how to properly label your products under the Act and CP121, you should refer to the Act, CP121 and other guidance and interpretations provided by the State of Vermont and the Vermont Office of Attorney General. You should also seek independent, legal counsel if you have any questions relative to this matter.
