March 2, 2016

Dear Valued Supplier:

As you may be aware, Vermont's mandatory genetic engineering labeling law, Act 120, is scheduled to go into effect on July 1, 2016. Pursuant to this law, "manufacturers," as defined under this law, are required to label certain food sold by Vermont retailers if it is or may be produced with "genetic engineering."

Consumer Protection Rule 121 ("Rule 121"), promulgated under Act 120, sets out the specific requirements.¹ Among other things, and subject to some exemptions, food produced with "genetic engineering" and offered for retail sale in the State of Vermont must be labeled as: (1) "Produced with Genetic Engineering," (2) "Partially Produced with Genetic Engineering" or (3) "May be Produced with Genetic Engineering."

UNFI reminds you of your obligations to produce food in compliance with applicable state and federal law, such as Act 120, and of your indemnity obligations in the event of a breach of those obligations.

While it is possible that Act 120 may be prohibited or overruled, the compressed time period for compliance requires that we prepare now. To help us in this process, please:

1. Confirm in writing that the labels on each of your products distributed by UNFI are accurate and comply with governing law, including with respect to the requirements of Rule 121
2. To the extent the products you supply UNFI are not genetically engineered, we require that you sign and send us the attached Sworn Statement for any of your products distributed by UNFI

Thank you for your cooperation. We are here to help you navigate this new law, which is very important to many of our customers. Please contact your Supplier Relationship Manager (SRM) with any questions.

Sincerely,

A handwritten signature in blue ink that reads "Melissa Angle".

Melissa Angle
