I, BETH BOURDON, as the authorized agent of the Manufacturer/ Producer listed above, hereby depose and state as follows:

A. Non-Genetically Engineered	
<input checked="" type="checkbox"/>	This term shall be used to describe products that have no genetically engineered (non-GMO) potential. They have not been knowingly or intentionally commingled with food produced with genetic engineering They contain NO ingredients, additives or processing aides derived from commodities that have commercially grown genetically engineered varieties in the supply chain (i.e. contains no soybean, corn, cotton, canola, beet sugar, squash or papaya)
B. IP Non-Genetically Engineered	
This term shall be used to describe products that contain ingredients, additives or processing aides derived from commodities that have commercially grown genetically engineered varieties in the supply chain, BUT do not contain material derived from genetically modified plants because they have been sourced from traditional crops under an identity preserved program that is documented by the supplier.	
<input type="checkbox"/>	IP Certified Non-Genetically Engineered: The IP program is monitored and confirmed by a 3rd party. Must be able to provide the 3rd party certificate for finished product.
<input type="checkbox"/>	IP Non-Genetically Engineered: There is a written IP program, or the raw materials used are a combination of IP certified or No-genetically engineered potential, but there is no confirmation by a 3rd party
C. Confirmed or Potentially Genetically Engineered	
<input type="checkbox"/>	This term shall be used to describe products that have confirmed or may potentially contain material made from crops grown from genetically modified seed.
<input type="checkbox"/>	% Percentage of genetically engineered material by weight. I.e. product is multi-component and only part of the product is derived from genetically engineered crops.

I declare or affirm, under penalty of perjury, that the above statement is true and correct to the best of my knowledge.

GENETICALLY MODIFIED INGREDIENTS

H J Heinz has a non GMO policy, which states that H J Heinz does not use any ingredients from GM origin.

We would like to assure that HJ Heinz has no plans to change this policy with the introduction and/or amending of European GM regulations:

- Regulation 1829/2003/CE concerning genetically modified food and feed (repealing Regulations 1139/98/CE, 49/2000/CE and 50/2000/CE and amending Regulation 258/97/CE),
- Regulation 1830/2003/CE concerning the traceability and labelling of genetically modified organisms and the traceability of food and feed products produced from GMOs.

HJ Heinz remains committed to taking every possible step to ensure that HJ Heinz varieties remain free from ingredients derived from genetically modified crops.

Where there is the potential for GM material to be present, or where ingredients are derived from soya or maize, we source non-GM, identity preserved ingredients through carefully audited suppliers.
